

Fabvhp Hub Bearings

*For AMAT VHP®, VHP+ and Producer®
200mm and 300mm robots*

Hybrid ceramic x-style hub bearings increase product life and reduce particle generation.

- Bearings consist of ceramic load-bearing balls with smaller stainless steel spacer balls for durability
- Races are made from hardened 440 stainless steel to reduce wear and increase product life
- Shields help to retain lubricant within the bearing to further reduce particle contamination
- High-performance, long-life grease is compatible with high-vacuum environments and a wide range of process chemistries
